

Functionality Documentation - DeploymentApp

1. Introduction

DeploymentApp is a smart-facility deployment and operational management mobile application developed using Ionic Angular and Capacitor technologies. The application is designed to provide a centralized platform for deployment engineers, facility administrators, and maintenance teams.

1.1 Scope

The system supports Android-based deployment operations and provides centralized management for buildings, floors, operational areas, sensors, and smart devices.

2. Functional Modules

The Dashboard module acts as the central monitoring interface where users can monitor buildings, floors, areas, sensors, and smart devices using interactive floor maps.

7.3 Testing Results

Test Case ID	Test Scenario	Expected Result	Status
TC-001	Launch QR Scanner	QR scanner opens successfully	Pass
TC-002	Scan Valid QR Code	Device ID extracted	Pass
TC-003	Retrieve Device Info	MAC ID displayed correctly	Pass
TC-004	Select Device Type	Selected device type stored	Pass
TC-005	Capture Image	Captured image in preview	Pass
